

iX-Eye is a web browser based GUI developed by Fixnetix providing a real time view and interactive command and control of all trading activity. It supplies three essential functions: real time trade flow, compliance and configuration of trading systems, and finally real time administrative functionality- such as stop trading, order cancellation, modifying trading limits etc. iX-Eye is rapidly deployed, requiring no installation, merely a compatible browser. It is compatible with multiple EMS products, including iX-EMS, iX-eCute, sponsored access and third party EMS systems. It is fully configurable to the clients needs- for example it can display all trades in a unified currency, or the client can set the same trade limits across different markets.

The screenshot displays the iX-Eye web interface. At the top, the 'fixnetix iX-EYE' logo is visible, along with the tagline 'THE CAPITAL MARKETS TECHNOLOGY PARTNER'. Below the logo, there are several tabs: 'IX', 'Client Summary', 'FIXN_AL_CLIENT_1/MLSE', 'Configuration', 'Restrictions', and 'Orders'. The main area shows a table of orders with columns for Order ID, Source, Co..., Client Order Id, Side, Order Type, Order Status, Symbol, Exchange, and Order Qty. The table contains 18 rows of data, including orders for 'FEED10' and 'BNPP.PA'. Below the table, there is a 'Page 1 of 8' indicator and navigation arrows. At the bottom, there is a 'Life Cycle' tab and a table with columns for Client Order ID, Execution ID, Transaction Time (UTC), and Last Market. This table shows several entries for order ID '6066' and '6067' with their respective execution IDs and transaction times.

Order ID	Source	Co...	Client Order Id	Side	Order Type	Order Status	Symbol	Exchange	Order Qty
